

VEETI NURMIKOSKI

Computer Science student · Full-stack, native macOS and applied ML

Tampere / Vaasa, Finland · veeti.v.nurmikoski@gmail.com

vnrmk.com · github.com/veetin0 · linkedin.com/in/veeti-nurmikoski-796a46328

Third-year Computer Science student at Tampere University, currently working there as an IT support trainee. I build things end to end — full-stack web apps, native macOS tools and applied machine learning — and I ship them: ten projects so far, four of them running in production. Placed third at the Koja Hackathon 2026 with a team of six. Looking for part-time development work alongside my studies, or a graduate role once I finish.

TECHNICAL SKILLS

Web TypeScript · React · Next.js · Tailwind CSS · Prisma · PostgreSQL · REST APIs · authentication (NextAuth, JWT)

Native & mobile Swift · SwiftUI · AppKit · React Native · Expo

ML & data Python · PyTorch · Whisper · reinforcement learning (Gymnasium, Stable-Baselines3) · pandas · NumPy

Systems C / C++ · Linux · Docker · Git · shell scripting · networking (DNS, DHCP) · Raspberry Pi

AI-assisted development Daily use of LLMs in the build loop since 2025 — directing, reviewing and verifying generated code rather than accepting it. Comfortable decomposing a task into something a model can do well, then checking the output against real behaviour.

SELECTED PROJECTS

Full write-ups, screenshots and source at vnrmk.com

HVAC Control Agent · Koja Hackathon 2026 — 3rd place, team of six 2026

- Two-day competition: control heating and ventilation for a simulated five-zone office at the lowest total cost, balancing energy against thermal-comfort and CO₂ penalties.
- My part was the search for good controller values — ML to explore the parameter space, narrowing it to the ranges worth testing, plus research and helpers the rest of the team built on.
- Python, EnergyPlus, PyTorch, Gymnasium, Stable-Baselines3.

Lyvo — ride sharing platform · live at lyvo-web.vercel.app (beta) 2025

- Full-stack Next.js application: publish a route, match passengers by proximity along it rather than at fixed endpoints, and book without leaving the map.
- Designed the schema and relations in Prisma over PostgreSQL; built the API routes, authentication (NextAuth, JWT, bcrypt) and seat inventory with optimistic booking.
- Trilingual (FI / EN / SV). Deployed to Vercel with CI/CD from GitHub.

Fun With Flags — offline-first geography game · live (downloadable at vnrmk.com) 2026

- A flag appears, you pan a real vector world map and click the country. Clicks hit actual Natural Earth polygons, not an image.
- Zero runtime network requests — 237 flags, geometry and fonts all bundled, with a service worker caching the rest, so it plays with no connection.
- React, TypeScript, MapLibre GL, Zustand, Vite. Six game modes; MIT licensed with third-party notices.

Command Center — macOS launcher and dashboard · live (downloadable at vnrmk.com) 2026

- Stream Deck-style tiles, Spotlight-style search across apps, files and custom actions, and a live system monitor — all behind one global hotkey.
- 100% Swift and SwiftUI, no third-party dependencies. Battery via IOKit, CPU from Mach tick deltas, memory from vm statistics.
- Shipped as MIT-licensed source rather than an unsigned binary, since it runs shell commands and AppleScript the user configures.

GymPlus — training log and program generator · prototype 2026

- React Native / Expo app: answer three questions and it builds an eight-week training block with sets, reps and rest tuned per goal.
- 180-movement exercise database, estimated 1RM via the Epley formula, weekly volume by muscle group, JSON backup export. No accounts, no network requests.

WORK EXPERIENCE

- IT Support Trainee** · Tampere University 2026 – present
- First role in the field: supporting staff and students with hardware, software and account issues.
 - Diagnosing and resolving technical problems under time pressure, across a large and varied user base of nearly 30 000 customers.
- Social Media Lead (freelance)** · Byyri 10/2024 – 10/2025
- Content production, video and image editing, and building brand visibility across digital channels.
- Assembler** · Crimppi Oy Summers 2023 & 2025
- Cable and electrical component assembly in an industrial setting; invited back on the strength of the first summer.
- Assembler** · VEO Group 06/2024 – 08/2024
- Retail Assistant (agency)** · StaffPoint Oy 10/2022 – 10/2024
- Sports Club Instructor** · City of Vaasa 2024
- Running children’s sports sessions — group management and responsibility as lead instructor.
- Earlier: summer camp assistant (City of Vaasa, 2021 & 2022), court maintenance (Vaasa Sportpark, 2022), front-of-house (Vaasan Uimaseura, 2021), grounds work (City of Vaasa, 2020).

EDUCATION

- BSc Computer Science** · Tampere University 2024 – present
- Second year. Coursework in programming, data structures and algorithms, software engineering and project work.
- Upper secondary** · Vaasan lyseon lukio 2021 – 2024

LANGUAGES

Finnish — native · English — fluent · Swedish — basic
